

Wall Mounting the Lifeline Connect+

IMPORTANT: When printing this document, please ensure all page scaling (shrink to fit) features are turned off and the document is printed to scale. To be certain that the printed document is correct, please measure the distance between the marks using a ruler before using the template.

Decide where you want to situate the home unit. Remember it should be within 2 metres of a mains power socket and the main telephone line socket. Then drill 2 holes 146mm apart, firmly attach screws (not supplied) leaving the screw heads protruding the surface and then locate the wall mounting points on the home unit with the screws.
